Technical Specifications

Rated Voltage	415V AC(10%)50-60HZ	Length(between inlet and outlet)	1537mm
Rated power	11kw	Length x Width x Height	3200×450×630
Motor speed	1450r/min	Tube Material	Q235
Screw speed	145r/min	Blade Material	NM450/PU345B/65Mn
Capacity	20 m3/hr	Gross Weight	435kg
Capacity	20 m3/hr	Operating Environment	0°C~+55°C

**Not suitable - For corrosive or conductive materials. For violent vibrations or impact.

- The best and most economic solution present on the market.
- Huge reduction of dust disposal costs.
- Hassel-free maintenance.
- SINT: wear-resistant engineering WAM polymers for very low maintenance, easy cleaning and effective wear protection.
- No material residue.
- Less consumption.
